### Career Objective

---

As a Junior MERN Stack Developer specializing in JavaScript, React, NextJS, NodeJS, ExpressJS, MongoDB and AI-enhanced development workflows to build intuitive, high-performance web applications. I aim to leverage my strong JavaScript logic and consistent GitHub activity to help a global remote team deliver simple, user-focused products that solve complex problems without unnecessary friction

### Technical & Soft Skills

---

**Language:** JavaScript

**Frontend:** ReactJs, NextJs, Tailwind, Bootstrap, HeroUI / DaisyUI

**Backend:** MongoDB, ExpressJs, NodeJs, BetterAuth, JWT Authentication

**Tools & Technology:** VsCode, Netlify, PostMan, Vercel

**Soft-Skills:** Fast Learner, AI Enthusiast, AI Productivity Learner, People Handling, Communications Expert

### Project

---

#### Study Nook

[Live Link](#) || [Client Side Github](#) || [Server Side Github](#)

**Project Overview-** Project Name: Study Nook Description: Engineered a full-stack study room reservation platform designed to simplify workspace management for students and professionals through intelligent scheduling, real-time availability tracking, and conflict-free booking workflows.

#### Key Features:

- Developed a room management system that allows users to create, update, and manage study rooms with real-time availability tracking.
- Implemented booking conflict detection logic to prevent overlapping reservations for the same room and time slot, ensuring data consistency.
- Built a responsive dashboard with secure authentication, enabling users to book rooms, manage reservations, and view booking history seamlessly.

**Tech Stack:** Next.js (Optimized Rendering & SEO), Node.js, Express.js | MongoDB | JWT Authentication, BetterAuth, Tailwind CSS, REST API, Git, Postman.

#### Tile Lux

[Live Link](#) || [Client Side Github](#)

**Project Overview-** Project Name: Tile Lux Description: Engineered a full-stack tile gallery platform designed to simplify tile discovery and showcase premium collections through advanced search functionality, secure authentication, and an intuitive browsing experience.

#### Key Features:

- Developed a searchable tile gallery that enables users to explore and discover tiles by title, category, and design attributes.
- Implemented secure authentication with profile management, allowing users to register, log in, update personal information, and access protected routes..
- Built responsive tile details and gallery interfaces with dynamic data fetching, providing seamless navigation and an engaging user experience across devices.

**Tech Stack:** Next.js (App Router), BetterAuth, MongoDB, Tailwind CSS, DaisyUI/HeroUI, REST API, SwiperJS, Git, Postman.

### Educations & Certifications

---

**BSC In Computer Science & Engineering** - World University of Bangladesh (WUB) 2013 - 2017  
Dhaka | CGPA 3.92 ( Out of 4 )

**Complete Web Development With Programming Hero** - Programming Hero Jan 2026 - June 2026  
Online | [Certificate](#)

### Achievements & Recognitions / Extra curriculum Activities
